

CASE STUDY

DESIGN AND BUILD A
DROP SHIP PROCESS
FOR THIRD PARTY
CUSTOMERS FOR A
GLOBAL HEALTHCARE
COMPANY

The Client is a global healthcare solutions company that incorporates product manufacturing, distribution support, and innovative technology services to deliver significant and sustained value across the breadth of the industry

OBJECTIVE

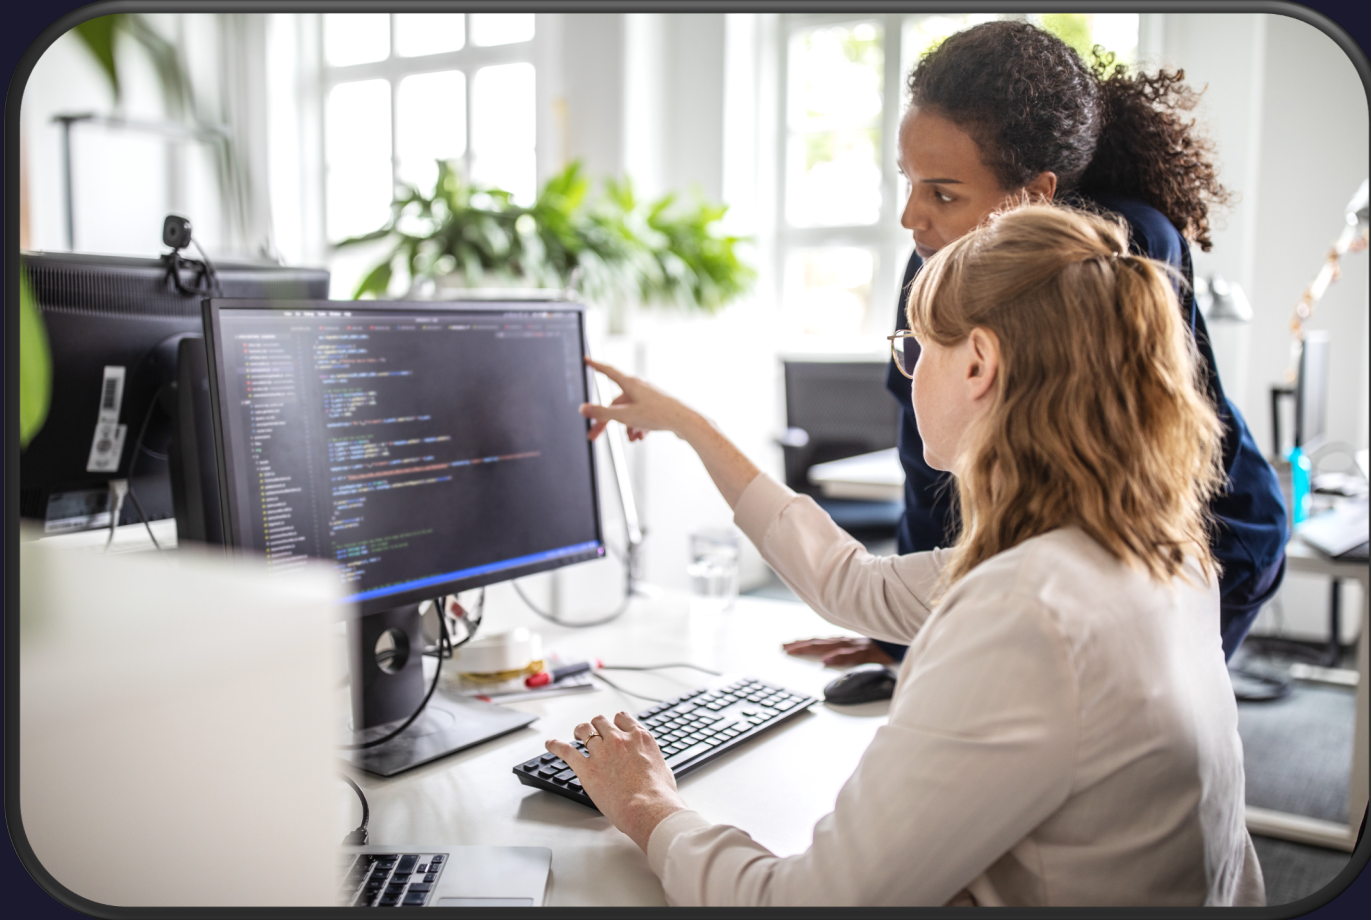

Design and build a drop ship process for third party customers in Asia Pacific as opposed to the traditional method of shipping to an OMI Distribution center and then ship to local customer

SOLUTION

Functional and technical knowledge in SAP Order to Cash, Transportation Management System, ALE/IDOCs for Process Integration with third party softwares, end to end testing and deployment.

BUSINESS CHALLENGES

Integration of legacy systems with current SAP system and field mapping to achieve a seamless flow between purchasing, shipping, receiving and billing process with auto generation of documents to trigger the next process

OUTCOME

When called upon to provide a viable and robust solution for the logistics challenges faced by a healthcare company, Vajraasys consultant designed the solution and deployed it. OMI business now has a reliable and scalable solution where SAP logistics modules are working in sync with the customer systems via interface. The integrated solution has resulted in a considerable saving of time and money which has been highly appreciated by end users and business units.
